But as long as there are not, will not you, Mrs. Housewife, be the inspector and visit the bakeries, then choose for yourself which bread you want to serve to your family?

## EUROPE IN 1923

IN MISERY 5 YEARS AFTER ARMISTICE

By MILTON BRONNER.  
NEA Service Staff Correspondent.  
LONDON, Dec. 30.—Europe five years after the war is afflicted with financial, economic, territorial and social troubles. Some Americans looking at the old world think these troubles may be cured by America's help. Others think it wiser for Uncle Sam to keep hands off.

Whatever you think about it, here is a tabloid picture of Europe at the beginning of 1923:

**ENGLAND**—By high taxation has succeeded in making its budget balance. Its currency is well on the way to rising to par with the dollar. But there are still about 1,300,000 persons out of work, for whose unemployment doles added taxes had to be raised. The number of jobless is a good indication of how heavily her export trade has fallen off and how hard her great industries have been hit.

**FRANCE**—Her devastated regions are still largely unrepared. She is still being taxed to maintain a huge standing army. Having drawn comparatively few cash payments from the Germans, her budget deficit is immense. Her currency is way below par. Her birth rate is still showing a dangerous decrease.

**GERMANY**—Bankrupt at home and abroad. There is a deficit of about \$60 billion of marks in her budget. She faces reparation demands from the allies that she says she cannot pay. The markets of a great part of the world are closed to her. Her imports exceed her exports and she is getting deeper into debt all the time. The existence of her republican form of government is threatened both by Bolshevism and Monarchists.

**ITALY**—Faced with a population the care of which taxes the ability of the farms and the factories beyond their means, the country is troubled by the immigration laws of the United States. Development is hampered by the depreciation of the lira with its consequent difficulty to buy raw materials for the factories, and by the huge debt in which the war involved her.

**BELGIUM**—Like France she badly needs the reparations from Germany. Her industry suffers from the general business depression in Europe. Internally she suffers from the contest between the French-speaking Walloons and the Flemish-speaking Flemings, which was accelerated by German propaganda during the war.

**PORTUGAL**—Hopelessly in debt, with no chance for betterment in sight, owing to the frequent revolutions which have overturned one government after another.

**SPAIN**—Has a deficit of over one billion pesetas in her budget. Unrest all over the country, owing to the popular opposition to the Spanish war in Morocco. Catalonia, of which the great industrial city of Barcelona is the metropolis, is causing further unrest by her constant demand for complete autonomy, if not independence.

**HOLLAND**—Troubled with high taxes and unfortunate speculations in the German mark.

**SWITZERLAND**—Suffering from paralysis in her two greatest industries—watch and clockmaking and hotel keeping. The high rate of the

Swiss money has kept many travelers away.

**JUGO-SLAVIA**—Menaced by external and internal troubles. Inside, the Croats are bitter opponents of domination by Belgrade. Externally, there is the constant danger of friction with Italy over Adriatic ports and with Hungary over the territory given old Serbia by the peace treaties.

**POLAND**—Her credit is so bad that her currency ranks at the bottom, with those of Austria and Russia. She is compelled to be constantly on the quiver because sooner or later she fears wars on two borders—the Germans fighting to take back Upper Silesia and the Russians fighting to take back the territory lost a little over a year ago.

**CZECHO-SLOVAKIA**—In itself a healthy state, but disturbed by the presence of 3,000,000 Germans who long for union with Germany. Has great industrial and agricultural possibilities, but is suffering from business depression, owing to the fact that its currency is so much more valuable than that of possible customers.

**Austria**—Totally ruined, her money worth nothing and herself a mendicant, waiting to receive alms from the allies through the medium of the league of nations.

**HUNGARY**—Seething with internal discontents, owing to the "White Terror" of the monarchists having replaced the "Red Terror" of the Bolsheviks. Seething also with hatred, the proud Magyars are merely awaiting their chance to fight Rumania for the return of the territory west of the Transylvania mountains, and Jugoslavia for the great wheat plains which were once the bread basket of the old Austro-Hungarian empire.

**BULGARIA**—Surrounded by hostile states, faced by reparation demands in the peace treaties with which she has not yet complied, and determined even by force of arms some day to reconquer a path to the sea where she can have her own port of which she was deprived by the allies.

**RUMANIA**—Troubled with crippled finances, aggravated by necessity of keeping an army ready to cope with Hungary on one side or with Russia on the other, if the latter attempts to take back Bessarabia.

**GREECE**—With finances ruined and territory lost in her smashing defeat of Asia Minor, she is torn by revolution.

**TURKEY**—Although victorious over the Greeks and a menace to all her neighbors she is ruined financially.

**RUSSIA**—Ruined financially and economically, ravaged by disease and famine, she is still a menace to all Europe.

**ESTHONIA, LETTONIA AND LITHUANIA**—In deadly fear of the Russian bear they have been unable to make their government going concerns, so far as business and industry are concerned.

**FINLAND**—Suffering also from general business depression and from the Russian danger.

**DENMARK, SWEDEN AND NORWAY**—Crippled rather than helped in world business by the fact that their money is up in the world.

Efforts of the queen and the prince of England to plant Wellington trees from the gigantic ones of California in the Royal Horticultural society gardens in 1881 met with failure, the transplanted trees dying.

## Dog Loved Him

With his dog as sole companion, little eight-year-old Johnny Miller, for three weeks slept in abandoned water tanks on the roofs of New York tenements and lived on bits of food offered by his school chums. His father was killed and his stepmother deserted him after giving him \$5. Now, cared for by the Children's Society, Johnny is recovering from exposure.
